THE MEDICAL COLLEGE, CALCUTTA

SHORT HISTORY

The college was established as a result of the recommendations made by the Medical Board drawing the attention of the Government of India in the Military Department to the desirability and necessity for the establishment of a medical institution in the Presidency to meet the demands of the various Station Hospitals and treatment of the people which at that time entirely depended upon Kavirajas and Hakims. The recommendations were very favourably received and early in 1835 the foundation of the Medical College of Bengal was laid by abolishing the native institutions attached to the Sanskrit College, the Madrassa and the native medical institution where medical instruction used to be imparted more or less on indigenous lines without any proper equipment. The Medical College of Bengal can claim to be the first medical institution which combined instruction in Preliminary sciences with clinical training in all the medical subjects, *viz.*, Medicine, Surgery and Midwifery, superseding the practice of training students in special subjects according to their choice after their having passed the preliminary scientific subjects. In this respect the Medical College of Bengal may very appropriately be termed as the pioneer institution giving all-round instruction to all candidates joining it.

The college was affiliated to the Calcutta University in 1857 and it was in 1861 that students graduated for the first time.
